

Figure S5. Correlations of CNA signatures in different datasets

A, Inter-correlations between the CNA signatures extracted in single-cell shallow WGS dataset and bulk WGS dataset. Cosine similarity values are reported for each comparison.

B, Inter-correlations between the CNA signatures extracted in single-cell shallow WGS dataset and bulk shallow WGS data dataset.

C, Inter-correlations between the CNA signatures extracted in single-cell shallow WGS dataset and bulk SNP array dataset.

D, Inter-correlations between the CNA signatures extracted in bulk WGS dataset and bulk SNP array dataset.
